How does physician credentialing work?

Physician credentialing is necessary for doctors to provide proof of their qualifications and get paid for their services

The process involves verifying credentials such as acceptance to a hospital, malpractice insurance, academic transcripts, work history, and references

Strategies to Increase Physician Credentialing Process

1. Start Early
2. Attention to Detail
3. Update CAQH Profile
4. Ask New Provider
5. Know the Key Payers

Standards for Physician Credentialing

CMS and the Joint Commission on Accreditation of Healthcare Organizations establish physician credentialing requirements

Other organizations involved are:

Utilization Review Accreditation Commission (URAC)

The National Committee for Quality Assurance (NCQA)

Det Norske Veritas (DNV)

The Accreditation Association for Ambulatory Healthcare (AAAHC)
